DETAILED ACTION***Response to Arguments***

Applicant's arguments filed 9/15/05 have been fully considered and are deemed persuasive. Applicant primarily argues that the referenced prior art does not provide for determining power for each transmit antenna and that the scheduler is not involved in scheduling the quantity of power available for data transmission. Applicant argues that the Walton reference does not handle unused power delta. Applicant also argues against the combination of references that take on the global minimum cost function limitation. The examiner accepts applicant's detail arguments that provide distinctions between his invention and the referenced prior art.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 10, and 17, a method for scheduling weighted power transmissions from two or more transmit antenna of a base station to each of two or more mobile stations in a closed loop transmit diversity system for each combination set of mobile stations the computing of unused power delta with reference to the quantity of power available for data transmission from each transmit antenna and the power required to transmit data from each antenna to each respective mobile station in the set and the computing of a global cost from a global cost function with having as one of its variables, unused power delta was neither found, suggested, nor made evident by the prior art.

Art Unit: 2684

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication from the examiner should be addressed to Alan Gantt at telephone number (571) 272-7878. The examiner can normally be reached between 9:30 AM and 6 PM within the Eastern Time Zone. The group FAX number is (571) 273-8300.

Any inquiry of a general nature or relating to this application should be directed to Supervisory Patent Examiner Nay Maung at telephone number (571) 272-7882.
